Executive summary

Introducing the new HP iPAQ hw6500 Mobile Messenger – a global communications device giving you the best in connectivity, productivity, and mobility. The iPAQ hw6500 Mobile Messenger is a small and sleek device with integrated GSM/GPRS/EDGE technologies to give you high-speed wireless voice and data connectivity, making it easy to stay connected and productive on the go.^{1,2} Stay in touch however and whenever you want with multiple messaging capabilities such as text, picture, and instant messaging. GPS Navigation gives you driving directions at your fingertips so you get where you need to go. The iPAQ Mobile Messenger integrates seamlessly into an industry-standard Exchange 2003 environment running Server ActiveSync which enables you to synchronize your Outlook inbox, calendar, contacts, and tasks so you can remotely check your appointments and other important information. Integrated Bluetooth® wireless technology is also included for wireless communication with other Bluetooth® devices.¹ Now it's never been easier to show clients and colleagues images, photos, and videos with the built-in HP Photosmart camera (on select models). A removable, rechargeable battery keeps your iPAQ Mobile Messenger running longer while an industry standard SD slot and Mini-SD slot give you options for more expansion and information storage. Stay connected and get more done on the go with your HP iPAQ Mobile Messenger.

What's iPAQ?

The HP iPAQ is a family of innovative personal devices that let you take advantage of the Internet, makes life easier, and keeps you in control. HP iPAQ products are distinguishable by their innovation (design and functionality), simplicity (acquisition, ownership, manageability, and service), usability (tailored), and experiences (customer-focused and productivity). The HP iPAQ hw6500 Mobile Messenger meets all of these criteria.

What's new?

High-speed global wireless technologies so you stay connected on the go

- Integrated GSM/GPRS/EDGE technologies provide broad high-speed connectivity while you are on the go.^{1,2}
 - EDGE (Enhanced Data for Global Evolution) technology makes it simpler for you to be as productive when you are on the go as you are in your home or office.^{1,2}
 - § EDGE technology helps mobile professionals perform at higher levels of productivity by providing real-time wireless access to critical business systems and applications.
 - § Mobile professionals can quickly view attachments such as spreadsheets, graphic presentations and text documents on the GPRS/EDGE wireless network – without sacrificing the familiar applications they use on their handheld.
 - § Download speeds up to 100-130 kilobits per second (Kbps).
 - GPRS technology offers broad access to Internet-based content and data services world-wide.¹
 - § GPRS Class 10
 - GSM technology delivers high quality mobile voice³ and data services⁴ (such as Short Messaging Service (SMS) and Multimedia Messaging Service (MMS) with roaming capabilities across the world.¹
 - § International quad-band GSM phone (850/900/1800/1900 MHz)

Multiple messaging capabilities so you stay in touch the way you want ^{1,2}

- Exchange 2003 – Synchronizes your Outlook inbox, calendar, contacts, and tasks so you can remotely check your appointments and other important information. The hw6500 integrates seamlessly into an Exchange 2003 environment with wireless ActiveSync enabled.
 - You won't need to worry about keeping your calendar up to date or having access to the latest email. Be "always up to date" by synchronizing Outlook email, calendar and contacts.
 - Flexibility to sync and receive information when you need it by using either push email (via SMS) or a scheduled "pull" from the Exchange server.
 - Lower cost of ownership and better return on investment because IT departments can support Exchange 2003 through their existing server.
 - § No need to buy and manage the cost and complexity of another server and its associated software.
 - § There is no need to install additional third-party programs.
 - § There are no additional middleware servers or desktop redirectors to manage.
 - VPN software provides enhanced security for wireless connection when accessing information remotely such as the Internet and email.
- Picture and Video Messaging - Capture and share moments as they happen with MMS messages ^{1,2}
 - MMS messaging is the ability to send messages comprising a combination of text, sounds, images and video to MMS capable devices. Send and receive photos, video, and voice messages from your iPAQ Mobile Messenger with MMS messages.
- Text Messaging – Can't talk? No worries, just send a SMS message ^{1,2}
 - SMS messaging is the ability to send text messages to and from SMS capable devices. SMS messages are a quick, easy, and discrete way to communicate.
- Instant Messaging – Communication in real time ^{1,2}
 - Instant messages are short messages exchanged in real time using familiar screen names or IDs. With instant messaging, you can see who is online and available to chat, busy, and offline.
- Multiple inbox capabilities -- Instantly access all of your email accounts and take care of business on the go. ^{1,2}
 - Access any combination of work or personal mailboxes from your iPAQ Mobile Messenger. ^{1,2}
 - Read and reply to all of your business and personal email accounts on one device including: ^{1,2}
 - § Post Office Protocol 3 (POP3)
 - § Internet Message Access Protocol 4 (IMAP4)
 - § Simple Mail Transfer Protocol (SMTP)
 - § Be alerted when email is received. ^{1,2}
 - § Call, send messages or email directly from your contact list. ^{1,2}

Integrated GPS Navigation powered by TomTom

- The integrated GPS receiver with HP iPAQ Quick GPS[®] Connection Utility in the iPAQ and GPS Navigation application powered by TomTom gives you driving directions at your fingertips so get where you need to go. Single city map included as a download from the TomTom website in North America and EMEA. Complete map sets available separately from the TomTom website. ⁵
 - Turn-by-turn navigation to nearby restaurants, hotels, airports, movie theaters, gas stations, museums and many other points of interest.
 - Download the map of your favorite city and start navigating.

- § Maps are available for most cities in the United States, Canada, and Western Europe.
- § Choose carefully because only one city map download is included with your iPAQ. Once you download a map, you only download the same map again.
- Complete map sets for the United States, Canada and Western Europe are available separately from <http://www.tomtom.com/gpsnavigation>.

Security

- Mobile professionals and others can easily secure their devices by using a PIN or password to control access, imposing industry-standard encryption to protect stored data, and providing fail-safe actions that automatically occur if a device is lost or stolen⁷.
 - By selecting either a PIN or password, a user is assured that only s/he gains access to the device.
 - If a user forgets a PIN or password, access can be regained by entering an answer to a pre-selected question.
 - In the event that a mobile device is lost or stolen, aggressive fail-safe actions can be automatically invoked to hard reset the device back to factory defaults after a pre-determined number of access attempts.
- A second layer of defense can be established with encryption, ensuring that sensitive information remains confidential.
 - A user can encrypt email, contacts, calendar, notes, My Documents and other files that are then automatically protected whether stored on the device or an external storage card.

Imaging capabilities opens the door for personal expression

- Integrated HP Photosmart camera (on select models) allows you to take a quick picture and share it by sending it wirelessly from your handheld to any e-mail address.
 - Capture and share instantly using the integrated HP Photosmart 1.3 MP camera with photos or video.
 - With 1.3 mega pixel resolution, you get sharp, high quality 4" x 6" pictures that are ready for print.
 - Store up to 600 photos or up to an hour of H.263 recorded video on a 128 MB SD card.⁷
 - Send pictures directly. No need to upload to a web site or send a link.
- Picture and Video Messaging - Capture and share moments as they happen with MMS messages.^{1,2}
 - MMS messaging is the ability to send messages comprising a combination of text, sounds, images and video to MMS capable devices. Send and receive photos, video, and voice messages from your iPAQ Mobile Messenger with MMS messages.
- HP Image Zone for iPAQs – photo and imaging software.
 - Easily organize and view your photos, photo slideshows, and videos on your HP iPAQ.
 - Print your photos wirelessly from your iPAQ to a variety of printers using Bluetooth or Secure Digital/MultiMedia (SD/MMC)⁷ cards, no computer required.
 - Email photos wirelessly to clients and colleagues right from your iPAQ.
 - Use HP Image Transfer and Active Sync to automatically transfer photos from your HP iPAQ to your PC.

Integrated Bluetooth® wireless technology

- Integrated Bluetooth¹ allows for wireless communication with other Bluetooth devices.

- Bluetooth headset for hands-free voice communication .
- Cable-free communication in and out of the office as well in Bluetooth equipped vehicles .
- Print your pictures, email and documents to a Bluetooth equipped printer .
- Exchange business cards, calendar appointments, documents, and more with other Bluetooth devices.
- Wirelessly synchronize data with your Bluetooth desktop or notebook PC using ActiveSync .
- The HP Bluetooth compatibility list provides Bluetooth devices that are tested with our Bluetooth enabled HP iPAQ devices. You can access this list at:
www1.hp.com/products/wireless/wpan/btcompmatrix.html

Small, sleek and feature-rich so you can achieve greater productivity on the go

- Sleek, cool design that's small enough to fit in almost any pocket or purse.
 - Internal antenna for the most compact design to not only provide a stylish but functional form factor.
- Integrated keyboard lets you easily compose email, notes, text, and instant messages.
- Serial IR provides you with an easy method of exchanging data between Serial IR enabled devices .

Additional benefits

Removable/rechargeable battery

Keep your iPAQ Mobile Messenger running longer when you are away from your desk. The 1200 mAh lithium-Ion battery is easy to install, remove, and recharge with an internal bridge battery to allow users to quickly swap batteries without losing valuable data. A n 1800 mAh extended lithium-Ion polymer battery may be purchased as an optional accessory to maximize the battery life of your iPAQ Mobile Messenger .

Display

One of the innovations that HP will continue to support is the use of the transfective display. Transfective display combines transmissive and reflective technologies. It offers up to 65,000 brilliant colors and a high-contrast ratio with rich color saturation. This new display technology provides crisper, clearer images and text , 3.0" (75mm) transfective TFT QVGA 64K color display with 240 x 240 touch screen .

Integrated Secure Digital (SDIO) and Mini-SD slots for greater storage and expansion

An integrated Secure Digital (SD) slot supports SD and Multimedia Card (MMC) memory cards and is Secured Digital Input/Output (SDIO) ready for greater storage and expansion.

- Secure Digital slot
 - Lets you easily expand your storage capacity with SD and MMC memory cards ⁷ so you can bring your important documents with you .
 - Allows you to easily transfer and store music, multimedia files, special programs, and more onto SD and MMC memory cards .⁷
 - Supports SDIO (Secure Digital Input/Output) technology such as cameras, barcode scanners, etc.
- Mini-SD slot (memory only storage)
 - Holds Mini-SD cards, new thumbnail-sized flash memory cards that are designed to meet the need for greater storage capacity in the smallest possible physical form factor. The Mini-SD

card was recently adopted by the SD Association as an ultra-small form factor extension to the SD card standard.

Increased memory

Many customers have expressed the need to safely store critical information. The iPAQ File Store is non-volatile memory used to store critical data, databases, and other important files. The data stored in the iPAQ File Store is protected from being erased as a result of a battery discharge or a full reset. The iPAQ File Store may also be used as an iPAQ Backup destination. The HP iPAQ hw6500 Mobile Messenger offers up to 72 MB user available memory that includes 8 MB of iPAQ File Store space and approximately 64 MB of SDRAM storage space.

The HP iPAQ hw6500 Mobile Messenger offers 64 MB SDRAM and 64 MB Flash ROM.

Backup and restore

To help ensure the protection of data on the device, iPAQ Backup is an application on the iPAQ Mobile Messenger that allows fast and easy backup and restore, selective backup and restore, scheduled backup, battery monitoring, password protection, and compression of the backup file. The selective backup and restore feature allows selection of the entire system, a specific file, or a database. Scheduled backup can be established based on defined time, date, or battery level. Scheduled backup and battery monitoring notifies the user with the option to accept, decline, or postpone the backup.

Advanced power management

This feature is useful for changing the battery usage time by adjusting the standby period. The standby settings display the approximate remaining usage time in hours and adjust according to the standby period selection.

Design and features

1. Speaker
2. Power/notification LED
3. Bluetooth LED Indicator
4. Stylus
5. Power button
6. Color display
7. SD slot (side)
8. End button
9. Mini-SD slot (side)
10. Inbox button
11. QWERTY keyboard with LED backlight
12. Reset button
13. 22-pin charge, sync connector
14. Stereo headphone/mic jack
15. 5-way joystick
16. Contacts button
17. IR window (side)
18. Send button
19. Image capture (side)
20. Volume up/down (side)

1. LED light (for photography)
2. 1.3 MP camera (on select models)
3. External antenna connection
4. Self portrait mirror
5. Battery door cover release

Specifications

HP iPAQ hw6500 Mobile Messenger

Specifications

Integrated wireless ^{1, 2, 3, 4}	Quad band GSM/GPRS/EDGE, Bluetooth® 1.2, IrDA SIR 1.2	
Integrated GPS ⁸	High sensitivity GPS receiver with HP iPAQ Quick GPS Connection Utility	
Operating system	Microsoft® Windows Mobile™ 2003 Second Edition software – Phone Edition Pocket versions of Microsoft software are included (Outlook, Word, Excel and Internet Explorer for Pocket PC)	
Processor	Intel® PXA270 Processor 312 MHz NOTE: Intel's processor numbering is not a measurement of higher performance	
Display	3.0" (75mm) Transflective TFT QVGA with 64K color with LED backlight	
Camera (on select models)	Built-in SXGA, HP Photosmart 1.3 MP, 1280 x 1024 resolution	
Memory	User Available	128 MB total memory (64 MB ROM and 64 MB SDRAM) Up to 72 MB user available memory that includes 8 MB iPAQ File Store
Dimensions	4.6" x 2.7" x 0.8" (118mm x 71mm x 21mm)	
Weight	5.8 oz (165 g)	
Indicators	LED 1 (bi-color green / amber)	Flashing Green LED – within GSM coverage area
		Flashing Amber LED – event notification / alarm
		Solid Amber LED – battery charging (Charger connected)
		Solid Green LED – battery fully charged (Charger connected)
		Flashing Red LED – low battery warning
	LED 2 – Bluetooth	Flashing Blue LED – Bluetooth radio ON
Power	Phone Notification	Vibrate, Audible, Visual message on the display
	Battery - Removable/Rechargeable 1200 mAh Lithium-Ion user swappable battery Optional extended 1800 mAh Lithium-Ion battery available for purchase	
	AC Power - AC Input: 100~240 Vac, 50/60 Hz, AC Input current: 0.3 Aac max Output Voltage: 5Vdc (typical), Output Current: 2A (typical)	
	NOTE: Battery run time varies based on the usage pattern of an individual user and the configuration of the handheld. Use of internal wireless capabilities, GPS and backlight will significantly decrease battery run time.	
Other interfaces	Integrated IrDA (SIR), USB 1.1 Client, Serial RS232, SD slot - Supports 1-bit SDIO and 4-bit SD/MMC type standard Mini SD Slot – Supports 1-bit and 4-bit SD/MMC Type memory standard	
Audio	Integrated microphone, receiver, speaker and one 2.5 mm stereo headphone jack, MP3 stereo (through headphone jack)	
HP exclusive applications	iPAQ Wireless; GSM/GPRS Settings Manager; GPS Navigation from TomTom (EMEA and NA) products ⁵ ; HP ProtectTools secured by CREDANT Technologies ⁶ ; HP Profiles; MMS Composer; Bluetooth Manager; iPAQ File Store; iPAQ Backup; Pocket Panel Lite; HP Photosmart Camera; HP Image Zone for Pocket PC; HP Image Transfer; Utilities: Self Test, iPAQ Audio, Power Status; and How Do I...? Guide	
Design features	4 programmable application quick-launch buttons, 5-way navigation joystick, touch-sensitive display for stylus or fingertip, voice record button, microphone and speaker	
What's in the box	HP iPAQ hw6500 Mobile Messenger, lithium-Ion 1200 mAh removable/rechargeable battery, removable flip cover, stereo earbud style headset with 2.5mm jack, AC adapter, charger adapter USB desktop synchronization cradle, stylus, belt case, Getting Started Guide, How Do I...? Guide and HP iPAQ Pocket PC Companion CD.	
Warranty	One-year parts and labor in most regions; 90 days technical support for software in most regions. Additional offers may vary by region.	

Options (sold separately)

HP, producing the most powerful productivity tools available today, offers a broad range of options to complement and increase the functionality of the iPAQ Mobile Messenger. Customize your iPAQ Mobile Messenger for functionality, style, and fun with several accessories. For the most up to date list of options go to:

Memory and storage

128 MB, 256 MB, 512 MB, and 1 GB SD memory card

Secure Digital memory cards let you store more programs and files than ever before. Create SD music cards to use during your daily commute or to take with you on long trips. Use SD cards to back up sensitive files that are stored on your iPAQ Mobile Messenger. Store special programs on an SD card to free up memory for daily operations on your iPAQ Mobile Messenger.

Part number:

FA135A#AC3—128 MB

FA136A#AC3—256 MB

FA184A#AC3 —512 MB

FA283A#AC3 – 1GB

Power

Batteries

Always have a spare battery and you'll never be without power while on the go. Extend the length of time you can use your iPAQ Mobile Messenger with a standard or extended removable, rechargeable Lithium-Ion Battery. This battery provides additional power to extend the life of your iPAQ Mobile Messenger between charges.

Part number

1200 mAh Standard Battery — FA404A#AC3

1800 mAh Extended Battery — FA405A#AC3

AC adapter

An AC adapter provides rapid charging of your iPAQ Mobile Messenger at home, at work, or when traveling. It also works great with a USB synchronization cradle/charger.

Part numbers:

FA372A#ABA—U.S., Canada, Latin America, Japan, Taiwan

Note: For more information on the correct AC adapter for your country, visit www.hp.com/products/pocketpc/options.

Automobile adapter

Use your iPAQ Mobile Messenger while it is charging or turn it off to charge the battery even faster, just like your cellular phone. One end of the automobile adapter plugs into your iPAQ Mobile Messenger and the other end plugs into your car's cigarette lighter.

Part number: FA125A#AC3

Charger adapter

With the charger adapter, you can always charge your iPAQ Mobile Messenger. Keep one at the office, one in the car, one at home, or a spare for when you're traveling. It works with the AC adapter and auto adapter to convert the barrel plug to the universal connector plug.

Part number: FA133A#AC3

Input devices

iPAQ Bluetooth folding keyboard

Improve productivity when using your iPAQ Mobile Messenger with a foldable keyboard. The standard layout allows you to effortlessly take notes, create e-mail, or write reports and in the case of the Bluetooth wireless version, you are free to work in landscape screen mode, if available. The keyboard is great for entering a large amount of data quickly. When not in use, the keyboard folds up into an ultra-small package for easy portability.

FA287A#AC3—WW English

Foldable keyboard

When using your iPAQ Mobile Messenger, the foldable keyboard's standard layout allows you to effortlessly take notes, create e-mail, or write reports. When not in use, the keyboard folds up into an ultra-small package for easy portability.

Part number:

FA118A#ABA—United States English

FA118A#ABU—United Kingdom English

FA118A#ABD—German

FA118A#ABF—French

FA118A#ABZ—Italian

FA118A#ABM—Latin American Spanish

FA118A#AC4—Brazilian Portuguese

FA118A#ABJ—Japanese

Stylus three-pack replacement kit

Lost another stylus? Order a Stylus three-pack for your iPAQ Mobile Messenger and never be without a stylus again!

Part number: FA261A #AC3

Synchronization

Desktop USB cradle/charger

Don't fumble around with cables to synchronize your iPAQ Mobile Messenger with your office or home PC. With an AC adapter (sold separately), you can also charge your battery every time the iPAQ Mobile Messenger sits in the cradle. Keep an extra at home.

Part number: FA260A#AC3

AutoSync Cable (USB and Serial)

The AutoSync cable provides easy synchronization of your iPAQ Mobile Messenger with your office or home PC through a USB or serial connection. It is great to have one at both locations, and this cable takes up less space than the desktop cradle when you are traveling. A must for the road warrior! AC adapter or automobile adapter (not included) may be plugged into the cable to provide power while synchronizing.

Part number: FA122A#AC3

Headphones

Bluetooth Stereo Headphones

The HP Bluetooth stereo headphones allow you to turn your HP iPAQ Mobile Messenger into a wireless audio player. Listen to MP3s, video or any audio files on the go.

Part number: FA303A#AC3

Cases

Nylon Slimline Case

Constructed of heavy-duty durable nylon, this case holds your iPAQ securely in place with a self-closing cover flap. In addition, it comes with a convenient belt loop that is also self-closing and constructed of heavy-duty nylon for years of trouble-free use. Custom designed to provide the best fit for your iPAQ Mobile Messenger.

Part number: FA161A#AC3

Leather Belt Case

Protect your iPAQ Mobile Messenger with this stylish and convenient leather belt case.

- Attach to your belt clip
- Store business cards, credit cards, and other small items in the inside pocket

Part number: FA160A#AC3

Premier Leather Belt Case

Give your iPAQ Mobile Messenger that professional look by enclosing it in a Premier Leather Belt Case. This ultra-soft leather case is designed to hold your iPAQ in supreme luxury. All the premier leather cases are designed with internal pockets to hold SD memory cards, CF memory cards and more.

Part number: FA350A#AC3

¹ A standard GSM/GPRS infrastructure, other Bluetooth-enabled devices, separately purchased equipment, and a service contract with a wireless airtime provider may be required for applicable wireless communication. GSM/GPRS Wireless Internet access requires separately purchased Internet service contract. Check with service provider for availability and coverage in your area. Not all web content available. GPRS may not be available in all networks. GPRS data transmission speeds may vary based upon network capabilities and other conditions. Establishment and continuation of a GPRS connection depends on network availability, provider support and signal strength

² EDGE (Enhanced Data for Global Evolution) is a global standard for wireless wide-area data communication being rapidly deployed by GSM carriers worldwide. Actual download speeds may vary. Coverage is subject to transmission limitations and terrain, system, capacity and other limitations. Not all features and service options are available in all areas.

³ Telephone service requires separately purchased contract with a telephone service provider with coverage in your service area.

⁴ Normal GSM Data Calls (CSD) are not basic GSM data services. These services may not be available via all operators, and may require separate subscription. Maximum connection speed is used in defining maximum speed. The GSM Operator may change the speed of the connection and reduce time slots at its discretion if the network is congested. These actions may cause the total data rate to be lower than the requested data rate.

⁵ GPS Navigation (GPS receiver and navigation software) comes with a choice of one city map set from those available from TomTom. Other maps available for purchase from TomTom. Available in United States, Canada and Western Europe.

⁷ SD and MMC cards sold separately.

⁸ While the GPS radio on your device is able to connect to the GPS satellites without enabling the Quick GPS Connection feature, it may take a few minutes longer and even up to five minutes to locate the satellites without using Quick GPS Connection. User required to enable Quick GPS Connection updates.
